Brazil, São Paulo

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience across full-stack development, cloud infrastructure, data engineering, and production operations. Proficient in Python, JavaScript/TypeScript, Java, and C#, with deep expertise in AWS, Azure, and infrastructure-as-code (Terraform, Docker). Hands-on experience migrating legacy systems to the cloud, building ETL pipelines, and designing AI-powered internal tooling. Currently at Goldman Sachs, providing SRE support for FX, Fixed Income, and Commodities (FICC) trading platforms across São Paulo, London, and New York.

TECHNICAL SKILLS

Python · Go · Java · TypeScript · Node.js · Django/Flask · Spring Boot · gRPC · REST APIs · GraphQL · PostgreSQL · MongoDB · Redis · Apache Kafka · RabbitMQ · ETL pipelines · Data modeling · Microservices architecture · AWS · Azure · Docker · Kubernetes · Terraform · Git/GitHub · CI/CD · Linux · Nginx · Prometheus · Grafana · Distributed tracing · Structured logging · Incident response · SLO/SLA design

PROFESSIONAL EXPERIENCE

Goldman Sachs — Site Reliability Engineer

Oct 2024 – Present | São Paulo, Brazil

- Built a production support AI tool to query internal documentation and live logs, with RAG and GitHub Copilot.
- Migrated internal Apache servers from RHEL 7 to RHEL 8, producing documentation for other clusters to follow
- Collaborated with the Strats team to optimize infrastructure used for risk curves and pricing models.
- Delivered trainings on GitHub Copilot and AI-assisted workflows.

Alctel Telecom — Software Engineer

May 2023 – Mar 2024 | Belo Horizonte, Brazil (remote)

- Gathered client business requirements and integrated chatbot solutions with WhatsApp using C#, .NET and MySQL.
- Provided direct technical support to clients, leading meetings with their engineering teams to diagnose and resolve integration issues

GFT Group — DevOps Engineer

Jan 2022 – Mar 2023 | São Paulo, Brazil (remote)

- Led the migration of 200 on-premise applications to AWS using CloudFormation.
- Collaborated with the international team to automate document generation using Terraform and Python.

Suma Consulting Group — Software Engineer

Nov 2019 – Jan 2022 | Campinas, São Paulo

- Built ETL pipelines to ingest and preprocess large scale sensor data, preparing datasets for route optimization.
- Integrated low-latency UDP communication protocols from custom-built telemetry sensors with SUMA servers.
- Managed a cloud data warehouse on Azure, engineering pipelines and integrating with PowerBI for AI-driven insights.

Bit Capital — Backend Engineer

Jul 2019 – Oct 2019 | Campinas, Brazil

- Developed high performance APIs in TypeScript to be used in credit cards transacions.
- Worked in the integration with Pix system

Boilesen Associates — Full-Stack Developer

Mar 2019 – Jul 2019 | Campinas, Brazil

- Developed a digital marketing tool for lead generation and tracking using PHP and the Slim framework.
- Provided client support for Android Java applications, enhancing user experience and satisfaction.

Stoom — Software Engineer Intern

Jan 2018 – Oct 2018 | Campinas, Brazil

- Developed the Suprevida website using Apache Struts 2 and PostgreSQL.
- Collaborated with the team to address client demands and gather business requirements.
- Assisted in feature development and issue resolution for Brazil's leading retailer of domestic animal products.

Devnup IT Solutions — Software Engineer Intern

Jul 2017 – Dec 2017 · 6 mos

- Developed a sports distribution platform, Matchup Sports, utilizing Play, Spring, and AngularJS at Devnup IT Solutions.
- Enhanced platform functionality and user experience through skills in Springboot, Git, Docker, Java, and AngularJS.

PERSONAL PROJECTS

Yvy

Jul 2025 – Present

Environmental observability platform that tracks and overlays deforestation and wildfire data with firms, conservation units (UCs), and indigenous territories. Integrates official data from ICMBio and FUNAI to provide actionable insights for environmental monitoring and compliance in Brazil.

yvy.app.br github.com/samuelishida/yvy

JS Agent

Mar 2026 – Present

Browser-first multi-step agent with hosted/local LLM routing, modular skill runtime, modular prompt composition, context-aware orchestration, and durable memory/cache layers in local storage.
