PERSONAL PROJECTS

Yvy

Built an environmental observability platform tracking deforestation and wildfire data across Brazil. Overlaid data with land ownership, conservation units (protected nature reserves), and indigenous territories for compliance monitoring. Integrated official government data sources — ICMBio and FUNAI — to power actionable environmental insights.

yvy.app.br github.com/samuelishida/yvy

Hipfire

Official contributor to Hipfire, an open-source, RDNA-native LLM inference engine written in Rust for AMD GPUs — a local alternative to Ollama built on Rust, HIP, and the Redline dispatch layer, with no Python in the inference hot path. Contributed across the Rust runtime, HIP/ROCm kernels, quantization formats (MQ4/MQ5/MQ6), and an OpenAI-compatible serving API.

github.com/warpfront/hipfire

Celeste 64 Demake

Personal demake of Celeste 64 compiled into a Nintendo 64 ROM, built in C++ on libdragon and Tiny3D with a Python asset-bake pipeline. Implements a baked level pipeline from TrenchBroom maps, an interconnected Forsaken City world with chunked rendering and collision meshes, and Celeste-style movement — analog-stick control, jump, air dash, fall respawn, and collectibles — on real N64 hardware.

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years building resilient infrastructure and scalable backend systems, with early exposure to C and Linux before college through the Brazilian Informatics Olympiad and personal projects. Experience spans the full software lifecycle — system design, high-performance APIs in Python, TypeScript, and Java, and cloud modernization across AWS and Azure using Terraform, Docker, and Kubernetes. At Goldman Sachs, supports critical global trading platforms and leads internal AI initiatives with RAG and LLM orchestration to improve reliability and developer productivity.

TECHNICAL SKILLS

Python · TypeScript · Java · Node.js · C# · PHP · AWS · Azure · Docker · Kubernetes · Terraform · CI/CD · PostgreSQL · MongoDB · Redis · Kafka · Django · Flask · FastAPI · Spring Boot · LLM Orchestration · RAG · LangChain · OpenTelemetry · Bedrock · Prometheus · Grafana · Rust · HIP/ROCm · PowerShell

PROFESSIONAL EXPERIENCE

Site Reliability Engineer

Oct 2024 – Present · 1 yr 11 m São Paulo, Brazil · On-site

Goldman Sachs · Indirect Contract

- Built an agentic RAG incident response tool driven by an agent loop, a deterministic harness that repeatedly routes to specialized tools and skills (live log queries, documentation retrieval, runbook generation) to autonomously diagnose and resolve production anomalies, cutting detection and resolution time.
- Supports critical global trading platforms for FX, Fixed Income, and Commodities (FICC) across São Paulo, London, and New York, including on-call incident response, change management, and cross-region shift handovers.
- Led the migration of internal Apache servers from RHEL 7 to RHEL 8, documenting the rollout so other clusters could reuse the process.
- Ran AI-assisted post-mortems and runbook creation, and conducted handover calls across London and Asia shifts.
- Delivered training sessions on GitHub Copilot and AI-assisted workflows for engineering teams.

DevOps

May 2023 – Apr 2024 · 1 yr São Paulo, Brazil · Remote

Alctel Telecom · Full-time

- Gathered client business requirements and integrated WhatsApp chatbot solutions using C#, .NET, and MySQL.
- Led troubleshooting sessions with client engineering teams to diagnose and resolve production deployment and integration issues.
- Enhanced system telemetry with OpenTelemetry and optimized MySQL queries that were bottlenecking the application.

DevOps

Jan 2022 – Mar 2023 · 1 yr 3 m São Paulo, São Paulo, Brazil (remote)

GFT Group · Full-time

- Migrated 200 on-premise applications to AWS using CloudFormation.
- Automated document generation and infrastructure workflows with the international team using Terraform and Python, reducing a week-long process to a single day.

Software Engineer

Nov 2019 – Jan 2022 · 2 yrs 3 mos Campinas, São Paulo

Suma – Consulting Group · Full-time

- Owned system design, Azure infrastructure, and deployment workflows for the telemetry platform, spanning backend services, ETL pipelines, and production support.
- Built ETL pipelines to ingest and preprocess large-scale sensor data, preparing datasets for route optimization.
- Integrated low-latency UDP communication protocols from custom-built telemetry sensors with SUMA servers.
- Managed the Azure data warehouse, pipeline automation, and Power BI integration for AI-driven operational insights.

Backend Developer

Jul 2019 – Oct 2019 · 4 mos Campinas e Região, Brasil

Bit Capital

- Engineered high-performance APIs in TypeScript for credit card transactions and direct Pix (Brazil's instant payment system) integrations, ensuring security and low latency for financial ledger systems.
- Integrated systems directly with the Pix payment platform.

Backend Developer

Mar 2019 – Jul 2019 · 5 mos Campinas e Região, Brasil

Boilesen Associates · Part-time

- Built a digital marketing tool for lead generation and tracking using PHP and the Slim framework.
- Provided client support for Android Java applications, improving user experience and satisfaction.

Web Development Intern

Jan 2018 – Oct 2018 · 10 mos Campinas e Região, Brasil

Stoom – Soluções em E-commerce · Internship

- Developed the Suprevida website using Apache Struts 2 and PostgreSQL.
- Collaborated with the team to gather business requirements and address client demands.
- Assisted with feature development and issue resolution for Brazil's leading retailer of domestic animal products.

Web Development Intern

Jul 2017 – Dec 2017 · 6 mos

Devnup IT Solutions · Internship

- Built Matchup Sports, a sports distribution platform, using Play, Spring, and AngularJS.
- Improved platform functionality and user experience through Spring Boot, Git, and Docker.

Member

Mar 2014 – Sep 2016 · 2 yrs 7 mos · Campinas, Brazil

UNICAMP Phoenix Robotics Team

- Developed an autonomous robot for trekking competitions, enhancing the visual recognition system with OpenCV and Python.
- Collaborated with the UNICAMP robotics team to design innovative solutions for competition challenges.

Teaching Assistant

Mar 2015 – Jul 2015 · 5 mos · Campinas, Brazil

Universidade Estadual de Campinas · Internship

- Guided and supported students in Algorithms and Data Structures courses.
- Helped organize study sessions to facilitate learning of complex subject concepts.

EDUCATION

B.Tech in Information Security · Estácio

Fev 2023 – Nov 2025

Computer Engineering UNICAMP

2014 – Fev 2019

LANGUAGES

- **Portuguese:** Native
- **English:** Full Professional Proficiency (Cambridge B2 First, Score 169)

CERTIFICATIONS & HIGHLIGHTS

- **Foundations of Cybersecurity** — Google

- **Cambridge B2 First** — Score 169 (Full Professional English)
- **OBI – Silver Medal** (Brazilian Olympiad in Informatics)
- **UNICAMP Phoenix Robotics Team** (2014–2016): Developed autonomous robot with visual cone recognition using OpenCV and Python
