Brazil, São Paulo

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience across full-stack development, cloud infrastructure, data engineering, and production operations. Proficient in Python, JavaScript/TypeScript, Java, and C#, with deep expertise in AWS, Azure, and infrastructure-as-code (Terraform, Docker). Hands-on experience migrating legacy systems to the cloud, building ETL pipelines, and designing AI-powered internal tooling. Currently at Goldman Sachs, providing SRE support for FX, Fixed Income, and Commodities (FICC) trading platforms across São Paulo, London, and New York — combining incident management with hands-on development of RAG-based knowledge systems and automated reporting solutions.

PROFESSIONAL EXPERIENCE

Site Reliability Engineer

Oct 2024 – Present · São Paulo, Brazil

Goldman Sachs

- Architected an AI-assisted documentation tool, enabling conversational queries for support engineers and business users.
- Deployed a web-based reporting solution, significantly improving accessibility and operational efficiency for stakeholders.
- Collaborated with Strats/Quant team to enhance critical infrastructure.
- Delivered training on GitHub Copilot and AI-assisted workflows, enhancing productivity for production support engineers.
